Liquid Fence Co., Inc.
1365 Industrial Park Dr.,
Mt. Pocono, PA 18344

100% Guaranteed to Repel

Easy Shaker Bottle • No Spreader Needed • Long Lasting • Fresh Botanical Scent
Scientifically Tested • Proven Effective

MADE IN THE USA

Directions: To keep contents fresh, be sure to close bag tightly with twist-tie and close box after use.

For Overall Coverage: Apply **Liquid Fence® Snake Repellent Granular** evenly on and around areas where snakes are present such as lawns, patios, sidewalks, rocks, flagstones and around foundations.

For a perimeter barrier: Create a 2 to 3 foot wide band around property, buildings or landscaped garden areas.

Spreader Application: Due to product consistency and varying size of the granules, adjust spreader accordingly to achieve even coverage. Begin at the lowest setting that allows the product to flow

How it works...

Homeowners, gardeners, professional landscapers and commercial growers have discovered **Liquid Fence** stops deer and rabbit damage – NATURALLY!

Unlike other deer and rabbit repellents that require the animals to browse to be effective, **Liquid Fence** works on scent, so deer and rabbits don't even have to take a bite to be repelled. Because the animals' natural aversion to this scent will never diminish, **Liquid Fence** DOES NOT have to be rotated with other repellent brands.

For protection of vegetation above the height of 24 inches, we recommend using **Liquid Fence® Deer & Rabbit Repellent liquid**.

Instrucciones: Retire la tapa y el sello interior. Vuelva a colocar la tapa y apriete. (Conserve y vuelva a colocar el sello interior para conservar la frescura durante el almacenaje.)

Aplique el **repelente en gránulos de venados y conejos Liquid Fence®** de manera uniforme sobre y alrededor de plantas de bajo tamaño, lo que incluye macizos de flores, huertos, cubiertas de suelo y céspedes. Vuelva a aplicar cada tres o cuatro semanas a partir de ese momento.

Vuelva a aplicar después de una lluvia intensa. En áreas en donde los venados y los conejos se alimentan de forma intensa, es posible que se necesiten aplicaciones más generosas o adicionales. ¡Esto "entrenará" a los animales a evitar su patio! No aplique sobre cultivos comestibles por encima del suelo antes de cosechar.
