For Athletic Fields, Parks, Playgrounds & Golf Courses • 100% Money-back Guarantee

MADE IN THE  
**USA**  
SO

**Directions:** To keep contents fresh, be sure to close bag tightly with closure and close box after use.

**For Overall Coverage:** Apply **Yard Net Granular** evenly on and around areas where insects need to be repelled such as turf, landscaped garden areas and shrubs. Repellency lasts for a full week. Re-apply as needed.

**Spreader Application:** Due to product consistency and varying size of the granules, adjust spreader accordingly to achieve even coverage. Begin at the lowest setting that allows the product to flow evenly through the spreader. Apply 1 pound of product per 500 square feet.

### How it works...

For use on turf and ornamental landscaping. An eco-safe outdoor insect control, **Yard Net Granular** creates a repelling barrier in treated areas that dramatically reduces the presence of biting insects such as mosquitoes, fleas, ticks and black flies (gnats).

This environmentally safe insect control is safe for use around children, animals and vegetation. Its time-release biodegradable formula makes this repellent highly-effective and long-lasting.

**The time-release granular formula works continuously for a full week.**

**Instrucciones:** Para mantener el contenido fresco, asegúrese de cerrar la bolsa firmemente con el cierre y cierre la caja después del uso.

**Para una cobertura total:** Aplique Yard Net en granos de manera pareja sobre y alrededor de las áreas en las que es necesario repeler insectos, como el césped, las áreas de jardines y los arbustos. La repelencia dura hasta una semana. Vuelva a aplicar según sea necesario.

**Aplicación con esparcidor:** Debido a la consistencia del producto y al tamaño variable de los granulos, regule el esparcidor de forma tal que logre una cobertura uniforme. Empiece con el ajuste más bajo que permita que el producto fluya de forma uniforme por el esparcidor. Aplique 9,76 g del producto por cada m2 de césped.
