

# LIQUID FENCE® **PRO** D I V I S I O N

## TECHNICAL DATA SHEET

# Rabbit Repellent

### Features and Benefits

- Advanced dual-repellency formula
- Repels with scent and taste
- Guaranteed effectiveness
- Long lasting, year-round repellency
- For use on edible crops
- EPA exempt
- Approved for use in all states
- No additional licensing required\*
- All natural, non-toxic
- Will not harm vegetation

\* Check with local agencies for verification

### Ingredients (Concentrate %s)

#### Active:

Putrescent Egg Solids 10.00%

Garlic 3.60%

Sodium Lauryl Sulfate 1.40%

Potassium Sorbate 0.85%

Cinnamon Oil 0.39%

Thyme Oil 0.48%

#### Other:

83.28% (Water, Paprika, Xanthan Gum)

### Mix / Spread Rate

- 16:1
- 4 ppt @ ½ gallon of solution
- 8 oz. per gallon of water

### Coverage Rate

#### Blanket Coverage:

One gallon of concentrate = 32,000 sq. ft.

30 gallons of solution = approximately 1 acre

#### Direct Coverage:

One gallon of concentrate =

900 - 1,300 plantings

One gallon of solution = 60 - 80 plantings,  
depending on plant size

While most rabbits can be repelled with scent alone, high-density rabbit populations include many young rabbits with voracious appetites, and can be an extremely persistent problem. For this reason we've developed a dual-action formula that repels with both scent and taste – a guaranteed-effective, one-two punch to fight extreme rabbit problems! Ideal for all private and municipal properties from commercial farms to public parks and golf courses. Its all natural ingredients make it perfectly people friendly.

Depending on breed and geographic location, a female rabbit can give birth to 2 to 6 litters per year, with litter sizes ranging from 2 to 6 young per litter – that's a lot of rabbits! Preventive spraying with Liquid Fence® Dual Action Rabbit Repellent will stop the damage and costly losses.

### Rabbit tastes vary by region but all add up to big financial loss

As any landscaper who has had newly planted “color” wiped-out overnight will attest – rabbits will devour a huge variety of flowers and ornamentals. Rabbits also do serious damage to woody plants by gnawing bark or clipping off branches, stems, and buds. In northern states, when the ground is covered with snow, rabbits can severely damage expensive landscape plants, orchards, forest plantations, park trees and shrubs. Some young plants are clipped off at snow height, and large trees and shrubs can be completely girdled. Preventive spraying with Liquid Fence® Dual Action Rabbit Repellent will stop the damage and costly losses.

### All natural, EPA exempt

Liquid Fence Dual Action Rabbit Repellent has been thoroughly researched and tested to ensure superior product performance while maintaining eco-friendly standards. In fact, all ingredients are on the EPA's FIFRA 25(b) list of minimal risk ingredients. EPA registration exempt and approved for use in all states, typically no additional licensing is required for application, but checking with local agencies is recommended.

### Frequency Rate

Reapply every 3 weeks, or if over 1 inch of rain occurs in one week, or for new growth over 8 inches.

Reapplication may be necessary after torrential rains.

### Physical and Chemical Characteristics

Form: Liquid

Color: Brown – Gray

Odor: Strong Pungent

pH: 5.5 – 7.5

Vapor Density: Not determined

Evaporation Rate: Slower than water

Solubility in Water: Appreciable

Reactivity in Water: None

### Health Hazards

**ACUTE:** May cause irritation when inhaled, ingested or absorbed by skin

**CHRONIC:** Same

### Control and Protective Measures

**Respiratory Protection:** If vapors are present and irritation is experienced, NIOSH approved respiratory protection for organic vapors should be worn.

**Protective Gloves:** Recommended

**Eye Protection:** Recommended

**Other Protective Clothing and**

**Equipment:** Optional

### Product Size Availability

40 Ounce, Gallon, 2.5 Gallon, 50 Gallon and 260 Gallon Concentrates

**PATENT PENDING**

### Directions for use

For best results, add 8 ounces of Liquid Fence Dual Action Rabbit Repellent Concentrate per gallon of water and mix thoroughly. A non-latex spreader / sticker (not surfactant) may be added to increase sustainment against rainfall and / or irrigation. Apply as a foliar spray directly to vegetation. Apply enough product to the plants to give a “wet” look, do not apply to run-off. Rinse equipment thoroughly after use. Do not apply to above ground edible crops before harvest.

### To insure proper application

1. Mix THOROUGHLY and agitate solution frequently during use.
2. Apply solution directly to dry vegetation.
3. Do not irrigate until solution is dry.
4. Do not apply during direct intense sunlight.
5. Product can be applied year-round when temperatures are above 32° Fahrenheit.

### Spray Applications / Rate

1. Mix: 16:1
2. Apply approximately 30 gallons of solution evenly over one acre of area for blanket spraying
3. Product can be co-applied with any non-latex foliar spray with similar coverage rates
4. Non-latex spreader / sticker can be added to increase rainfast qualities of solution
5. A strong odor may be noticed during application, this will dissipate once product has dried, typically in one to four hours depending on humidity.
6. If white residual spotting occurs on vegetation, check mix and spread rates for accuracy, spotting is superficial and will disappear after a few days.
7. During periods of heavy infestation, product should be repeated one week after the initial application and then reapplied every two to three weeks as needed.

### Storage and disposal

Do not contaminate water, food or feed by storage or disposal.

**STORAGE:** Store in original container, in a cool, dry area inaccessible to children and pets. Protect from heat and freezing. Store between 40° - 90°F. Keep containers closed tightly to prevent evaporation. If spillage occurs, dilute with water and flush away.

**CONTAINER DISPOSAL:** Do not reuse empty container. All containers should be triple rinsed, then offered for recycling or reconditioning, or punctured and disposed of in a sanitary land fill, or incinerated or if allowed by state and local authorities, burned. If burned, stay out of smoke.
